

## Load the FX tool into the FX Box

Please watch this short install tutorial: <https://youtu.be/cSEUmQdTdSU>

For using the FX tool in Photoshop CC-2014 or newer, you already need to have installed the FX Box in Photoshop. If you haven't yet, please download it for free from [www.the-orange-box.com](http://www.the-orange-box.com) and install it.

If you've already installed the FX Box:

- open Photoshop
- open the FX Box Window > Extensions > FX Box
- Click the "+" button in the panel and browse to your FX Tool folder
- Use the (...) -installer.jsx
- **Done!** Your FX tool is now available in the library

## Remove the FX tool from the FX Box

- open Photoshop
- open the FX Box Window > Extensions > FX Box
- Click the Trash button and select the FX tool that you like to remove
- Click the Refresh button
- **Done!**

## Support and troubleshooting

Of course we will support you with the installation and usage of the plugin. Just write us an e-mail by using the contact form on our website.

But before you send your message, please read the instructions and watch the tutorials. It's much faster than waiting for a reply. We spend a lot of time to describe all steps very well.

### Didn't you find the answer?

Then please use the e-mail form at our website to contact us.

If you are reporting an issue:

- give us as much information as possible  
(Photoshop Version number, OS version)
- tell us what exactly you have done
- screenshots are helpful
- videos are very helpful. Try this free app: <http://recordit.co/>
